

PROTECTING OUR CIVIL LIBERTIES FROM COVID MADNESS - 8/7/2021

COVID-19 is being used by our enemies to destroy our civil liberties, and they don't plan to restore them... Americans should be horrified as they watch the civil liberties of people all over the globe being crushed by autocratic governments drunk with a COVID-fueled lust for control. Even as disarmed Europeans flock to the streets by the hundreds of thousands in a futile attempt to persuade their leaders to relent from the punishing cycle of abusive and tyrannical restrictions, each week predictably brings new, increasingly irrational, and exasperating erosions of civil liberties long taken for granted.

This is no accident; it is coordinated and by design. People are beginning to understand something terrifying: the COVID madness will never end, and perhaps their freedoms, now appreciated anew, will be lost forever. The enemies of freedom have tasted their nectar and it has only inflamed an appetite for more control.

- In Australia, the citizenry is on lockdown as the government has deployed helicopters and drones equipped with loudspeakers to track and corral any formerly-free citizen who dares to breath fresh air without a mask, stand too close to a loved one, or gather in a group. They have deployed the military to go door to door, terrorizing citizens and routinely meting out brutality to punish and deter any dissent. Meanwhile, they ominously inform the helpless citizenry to expect the same well into 2022.
- Italy has already imposed COVID passports required to enter gyms, swimming pools, museums, cinemas, theatres, sports stadiums, and other public venues, including indoor seating areas at bars and restaurants.
- In France, the government has imposed lockdowns with a strict curfew from 6:00 pm at night until 5:00 am in the morning, with no movement allowed except for essential reasons.
- In Germany, oppressive mandates have people demonstrating in the streets, often leading to brutal clashes with militarized police, even as special interest groups like LGBT pride events attracting tens of thousands are permitted unhindered.

Truly chilling, and they are planning the same thing here in our beloved USA. Such extreme measures, administered by bureaucrats with almost no accountability to the electorate and absent the robust civil liberties protections we have enjoyed in the US up until now, are leading to violent pushback from frustrated citizens.

The current, illegitimate administration in the US, emboldened by their CCP sponsors, covets such power. We must understand that this is coming here. However, free Americans have a huge advantage: the US Constitution. But the protections afforded by that august document are not self-executing – they must be exercised by the populace to have any value or impact.

We have the tools to prevent the USA from becoming a COVID police state. Those tools rust in the shed unless we remember how to use them, and if we don't use them, the next time we go to the shed to collect them, they will have been stolen in the night by our enemies.

“Zero COVID” strategies are scientifically baseless, impossible to achieve, and only serve to create an illusory, unattainable goalpost to justify continued imprisonment of formerly free populations. The time to engage is now. We no longer enjoy the luxury of relegating the maintenance of our civil liberty infrastructure to the government we have elected, because we no longer have the government we elected. Our way of life in a free society is under assault at a level not seen in generations. This is the last

hill, for if our enemies prevail, there will no longer be any room for dissent: freedom will be outlawed and all avenues of legitimate dissent will be foreclosed.

I stand ready to resist by all legitimate means the rapidly-encroaching elimination of our civil liberties. As an accomplished attorney and civil libertarian who fundamentally understands the essential preeminence of the protection of personal freedom, I will fight as long as I have the ability to preserve what generations of selfless Americans have purchased with their blood: our freedom.
